Warranty Information

OBi110 Installation

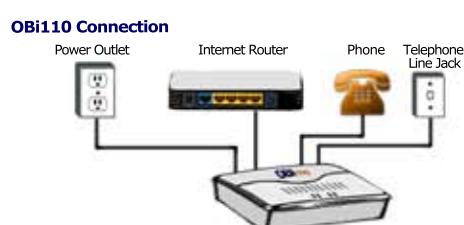

Please observe the following steps to install the OBi.

Note: Direct connection to the public switched telephone network or other apparatus performing a similar function must be made using the standard phone line cable supplied with the unit.

- A. Connect an analog phone to the OBi **PHONE** port. Use the cable currently connected to phone.
 - B. Connect one end of the Ethernet cable to the OBi **INTERNET** port and the other end to an Ethernet port on your Internet router or Ethernet switch.
 - C. Connect the 12-Volt power adapter to the OBi power jack and a power outlet.
 - D. (Optional) Using the supplied RJ-11 telephone line cable, connect the OBi **LINE** port to an active analog telephone (POTS) line jack.

LED Icon	Light Behavior	What It Means
	Off	The OBI is not receiving power.
	Solid Green	The OBI is operational.
	Flashing Green	The OBI is looking for a DHCP IP address.
	Flashing Orange	The OBI is upgrading. Do not unplug power!
	Solid Red	The OBI is non-operational.
	Flashing Green (Intermittent)	Light flashes when there is data activity on the OBI Ethernet port.

LED Icon	Light Behavior	What It Means
	Off	The port is not enabled.
	Solid Green	The phone is ready to be used.
	Flashing Green	The phone is in use.
	Off	The port is not enabled.
	Solid Green	The line is ready to be used.
	Flashing Green	The line is in use.

Using OBiTALK to Call Other OBi Endpoints

This OBi is ready to make FREE calls to other OBi endpoints using the **OBiTALK** network. On the bottom of your unit, you will see a 9-digit OBi Number. This is **your** OBi Number. Give this number to your friends, family and colleagues so they can call you from their OBi device or using an OBi software application for PCs or mobile phones.

To use the **OBiTALK** network, all you have to do is install your OBi, pick up the phone and then call your friends by dialing ****9** and **their** nine-digit OBi Number.

At any time, you can make a test call to the OBi Number below:

OBiTALK Test No:

Dial **9 followed by: 222 222 222

Using OBi to Bridge Other Services

After you have your services set up via the Obihai web portal, you can use the OBi to bridge services like calling from your mobile phone to the OBi and then connecting to your destination via a low cost service or the *no-cost* OBiTALK network.

To use a VoIP service from an attached phone dial destination number to call.

To Use a VoIP service from a remote phone, call the number associated with the OBi, allow the Attendant to answer, then follow instructions & enter destination number to call.

To bridge a call from one OBi endpoint to another, call the number associated with the OBi, allow the Attendant to answer, then follow instructions & enter ****9 + OBi No.** to call.

Compliance & Safety Information

Do Not Use for Emergency Calls or Contacting Emergency Services

This equipment is not intended to be used to call emergency services like 911, 112, 999, 000.

For indoor use only. Read installation instructions before connecting to a power source. The electric plug & socket must be accessible at all times as this is the main method to disconnect power from the device. Shock Hazard: Do not operate near water or similar fluid. Do not work with this device during periods of lightning activity. Do not touch wires at end of the phone cables or inside sockets.

Important: Only an analog telephone or fax machine should be connected to the OBi PHONE port. Do not connect a cable from the PHONE port to a telephone jack powered by the phone company. Doing so may cause damage to the OBi electronics. On the bottom of the device is a label that contains among other information, the FCC Registration Number. If requested, this information should be provided to the telephone company. The USOC jack for this equipment is RJ11C.

This equipment has been tested & found to comply with a Class B digital device in accordance with the specifications of the FCC rules. This product bears the CE marking indicating compliance with the 89/336/EEC directive. This device has been granted a registration number by the FCC under Part 68 Rules & Regulations for direct connection to telephone lines.

How to Perform a Factory Reset:

1. Power on the OBi device.
2. Locate the Factory Reset button access hole on the bottom of the OBi. It is a circular hole (a little larger than the others) just above and to the left of the Model ID on the product label.
3. Using a paper clip or similar instrument, depress the button inside the hole for 15 seconds.
4. The Power LED will flash red. This indicates you may release the button and the OBi will now be reset to its factory defaults.

Note: A service provider may restrict some settings from being reset to a factory default.

OBi Device Manager Web Page Access:

1. From a phone attached to the OBi, dial ******* to access the OBi config attendant.
2. Choose **"1"** to hear the IP address of the OBi.
3. Enter the OBi IP address in a local PC browser web site address window:

4. When prompted, enter **"admin"** for username & **"admin"** for password.
